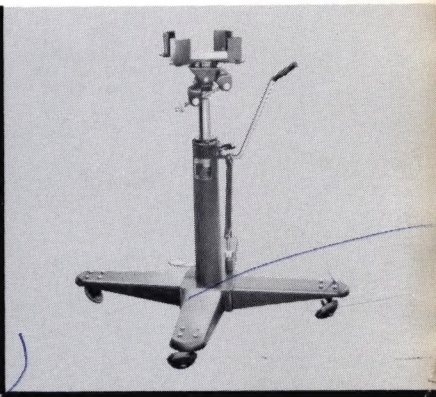
WUDEL *Hydraulic* TRANSMISSION JACKS

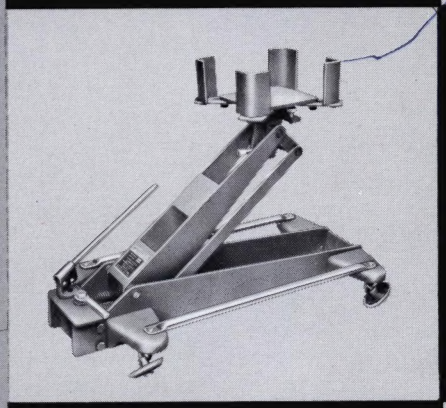
PRINTED IN U. S. A.

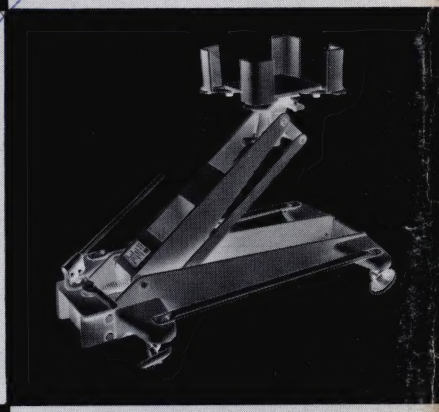
WUDEL Hydraulic Transmission Jacks assure strong, positive, precise control of all movements—horizontal, vertical, tilting and travelling—required to remove and install any automatic transmission.

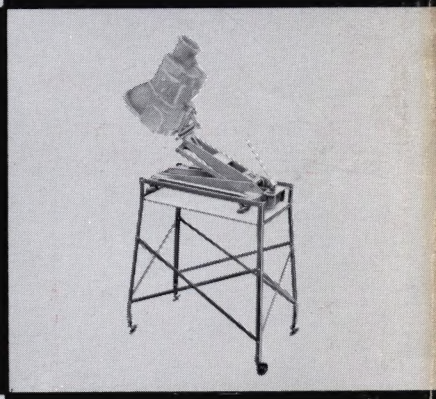
They provide safe, easy, one-man handling of all types and makes of automobile and light truck automatic transmissions.

Whether it's the KREEP-R for floor service operation, or the KLIME-R for overhead servicing, you'll find the best name in Hydraulic Transmission Jacks is WUDEL.







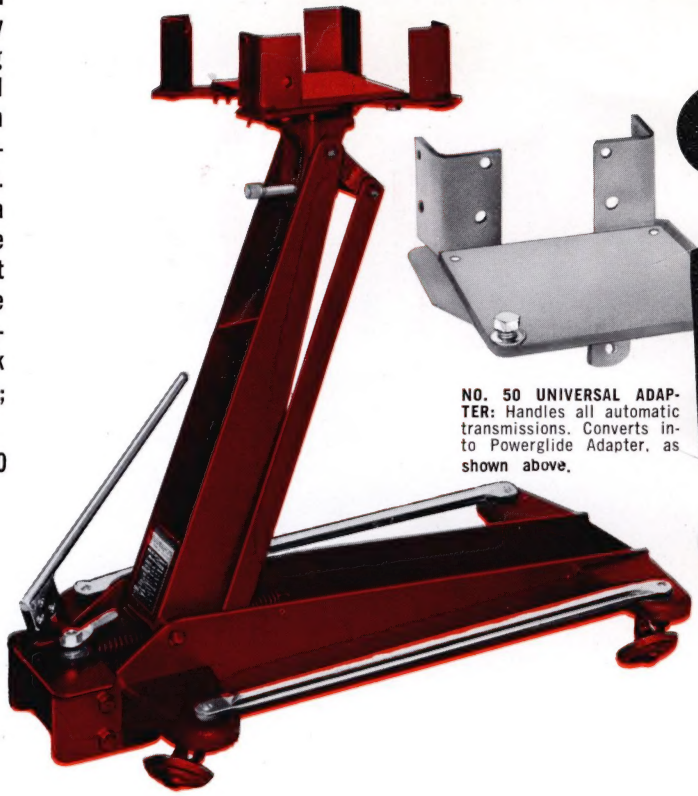


WUDEL *Hydraulic* TRANSMISSION JACKS

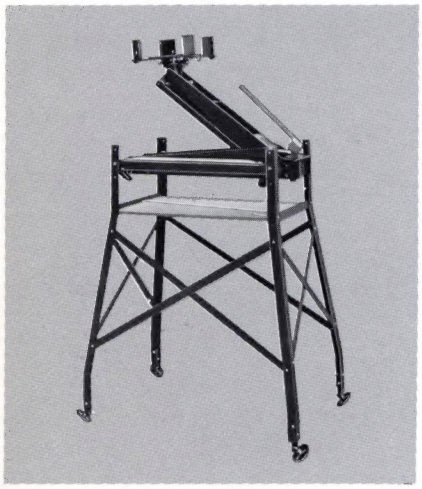
NO. 700-50 "KREEP-R" TRANSMISSION JACK

WUDEL No. 700-50 "KREEP-R" Hydraulic Transmission Jack with Universal Adapter, handles all automatic transmissions. The jack is hydraulically operated to assure fractional raising and lowering for perfect positioning and alignment of transmission. The hydraulic assembly unit is a special design. It is sturdily built and will handle eight times the weight of an average automatic transmission. It FEATURES full 360° rotating pumping handle. It FEATURES 90° forward tilt of Powerglide Transmission. It FEATURES bench-height lifting range to full 31 inches. It FEATURES a Universal Adapter that carries all weight of the transmission on the transmission pan flange to prevent damage to bottom of pan. It FEATURES the conversion of the Universal Adapter into Powerglide Adapter as shown. It FEATURES No. 60 Powerglide Adapter as an assembled unit. It FEATURES THE EXTENDED VERSATILITY to handle truck transmissions and differentials; Corvair Power Train; Tempest Transaxle; Porsche and Volkswagen Engines and Transmissions.

DEALER NET PRICE No. 700-50 Jack and Universal Adapter.....$219.50



NO. 50 UNIVERSAL ADAPTER: Handles all automatic transmissions. Converts into Powerglide Adapter, as shown above.



NO. 70 STAND for Model 700 Jack is sturdily built to more than carry the weight of any Automatic Transmission. The stand is adjustable to 42", 44½" or 47" high, as desired. Any of these heights are convenient positions from which to work, either from two post lifts or in pits. The jack is firmly fitted into channels on the stand, giving complete safety at all times. The free-rolling creeper wheels on the stand allow the entire unit to be easily rolled into working position.

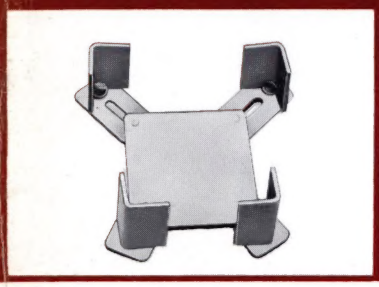
DEALER NET PRICE.....$76.50

NO. 700-50 SPECIFICATIONS

Capacity lifting load	1000 lbs.	Maximum forward tilt (Powerglide)	90°
Overall length	33"	Maximum backward tilt (Powerglide)	8°
Overall width	17"	Maximum forward tilt (Universal)	80°
Overall height (lowered position)	6½"	Maximum backward tilt (Universal)	20°
Maximum height	31"	Maximum side tilt (either side)	22°

Shipping weight — Jack with 2 Adapters — 100 lbs.

THE FOLLOWING ADAPTERS ARE DESIGNED TO USE WITH 700 AND 711 JACKS



NO. 50 UNIVERSAL ADAPTER fits all automatic transmissions. All the transmission weight is carried on the transmission pan flange; prevents damage to pan; adapter jaws snugly fit corners of pan. Converts into a Powerglide Adapter as shown on No. 700-50. Tilts forward 80°, backward 20°, and either side 22°. Adapter quickly changed by simply removing one pin.

Dealer Net Price.....$27.50

NO. 50-6 LOW CORNER LUGS (1¼ inches high) are interchangeable with standard lugs on No. 50 Universal adapter. These are especially favorable for handling transmissions that have shallow pans.

Dealer Net Price (set of 4)....$13.00

NO. 76 ADAPTER for handling Transfer Case (Model 203) in GMC 4 wheel drive. It is designed to fit No. 700 and 711 jacks.

Dealer Price.....$59.50

NO. 63 TRUCK CRADLE ADAPTER extends the versatility of the No. 700 Hydraulic Transmission Jack. It is designed to handle 4 and 5 speed truck transmissions in the Chevrolet, Ford, Dodge and other similar trucks. It is also handy for many conventional transmissions. It tilts the transmission forward to 80°, backward 20° and to either side 22°. **A transmission jack is not complete without this**

Dealer Net Price.....$25.75

NO. 711-50 "KLIME-R" TRANSMISSION JACK

NO. 50 UNIVERSAL ADAPTER converted for handling the C-4 CRUISE O MATIC Ford Transmission.

WUDEL No. 711-50 "KLIME-R" Two-Stage, Vertical Lift, Hydraulic Transmission Jack with Universal Adapter handles all automatic transmissions. It provides safe, easy, one-man handling when removing, installing or transporting all types and makes of automobile and light truck transmissions. It is precision engineered in a two-stage design with every requirement for overhead lift without handling the transmission. Hydraulically and mechanically operated, with adjustments and movements under complete control of operator, this SUPREME jack has a one-third faster lifting speed and a 1000 lb. handling capacity. The two-stage lift operates from a low position of 32″ to a high of 72″ — a total lifting range of 40″. The rotating pump handle operates with ease in any desired position; its function is not impaired with a Corvair Power Train on the jack. It FEATURES a Universal Adapter, which carries all transmission weight on transmission pan flange, preventing damage to bottom of pan, and can be converted into a Powerglide Adapter. No. 60 Powerglide Adapter is also available as an assembled unit. It FEATURES a locked transmission when in low position, preventing rotation, and enabling the mechanic to make minor repairs without removing transmission from jack. The FOUR WHEEL BASE provides absolute stability even at full height, with transmission tilted forward to 90°. OPTIONAL EQUIPMENT of either steel creeper-type or hard plastic wheels.

DEALER NET PRICE No. 711-50 Jack Universal Adapter.....$499.50

NO. 72 TORONADO and ELDORADO Transmission and Final Drive Adapter is especially engineered, properly designed, and sturdily built to safely remove and install the Transmission and Final Drive Assembly. This Adapter assures center-of-gravity positioning on both the #700 and #711 Jacks.

DEALER NET PRICE.....$29.50

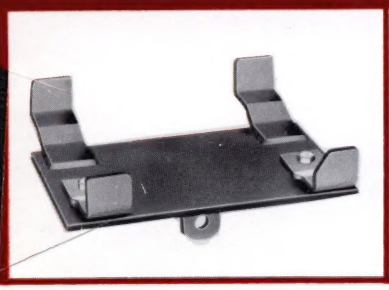
NO. 711-50 SPECIFICATIONS

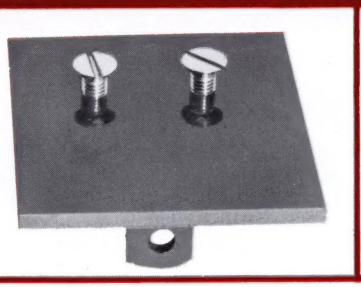
Capacity (lifting load)	1000 lbs.	Wheel tread	25½″
Overall length	42½″	Maximum forward tilt (Powerglide)	90°
Overall width	32″	Maximum backward tilt (Powerglide)	10°
Overall height (low position)	33″	Maximum forward tilt (Universal)	80°
Maximum height (pick up point)	72″	Maximum backward tilt (Universal)	20°
Wheel base	36″	Maximum side tilt (either side)	22°

Shipping weight — Jack and Adapters — 160 lbs.

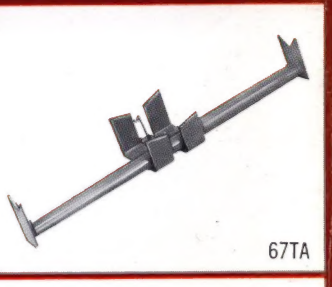
NO. 73 TORONADO Final Drive Adapter handles the Final Drive only. Final Drive is held firmly in the Adapter assuring safe handling.

DEALER NET PRICE..$18.75





66P



67TA

NO. 59-68VW ADAPTER for handling Volkswagen engine on No. 700 and No. 711 Transmission Jacks.

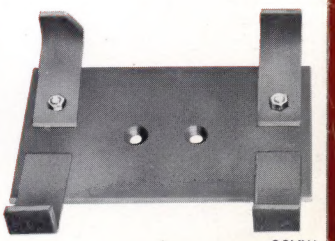
Dealer Price..... $22.50

NO. 59 ADAPTER PLATE is required for No. 700 or 711 Transmission Jacks to use No. 66P Porsche Engine Adapter, No. 67TA Volkswagen Transmission Adapter and 68VW Volkswagen Engine Adapter.

DEALER NET PRICE $5.75

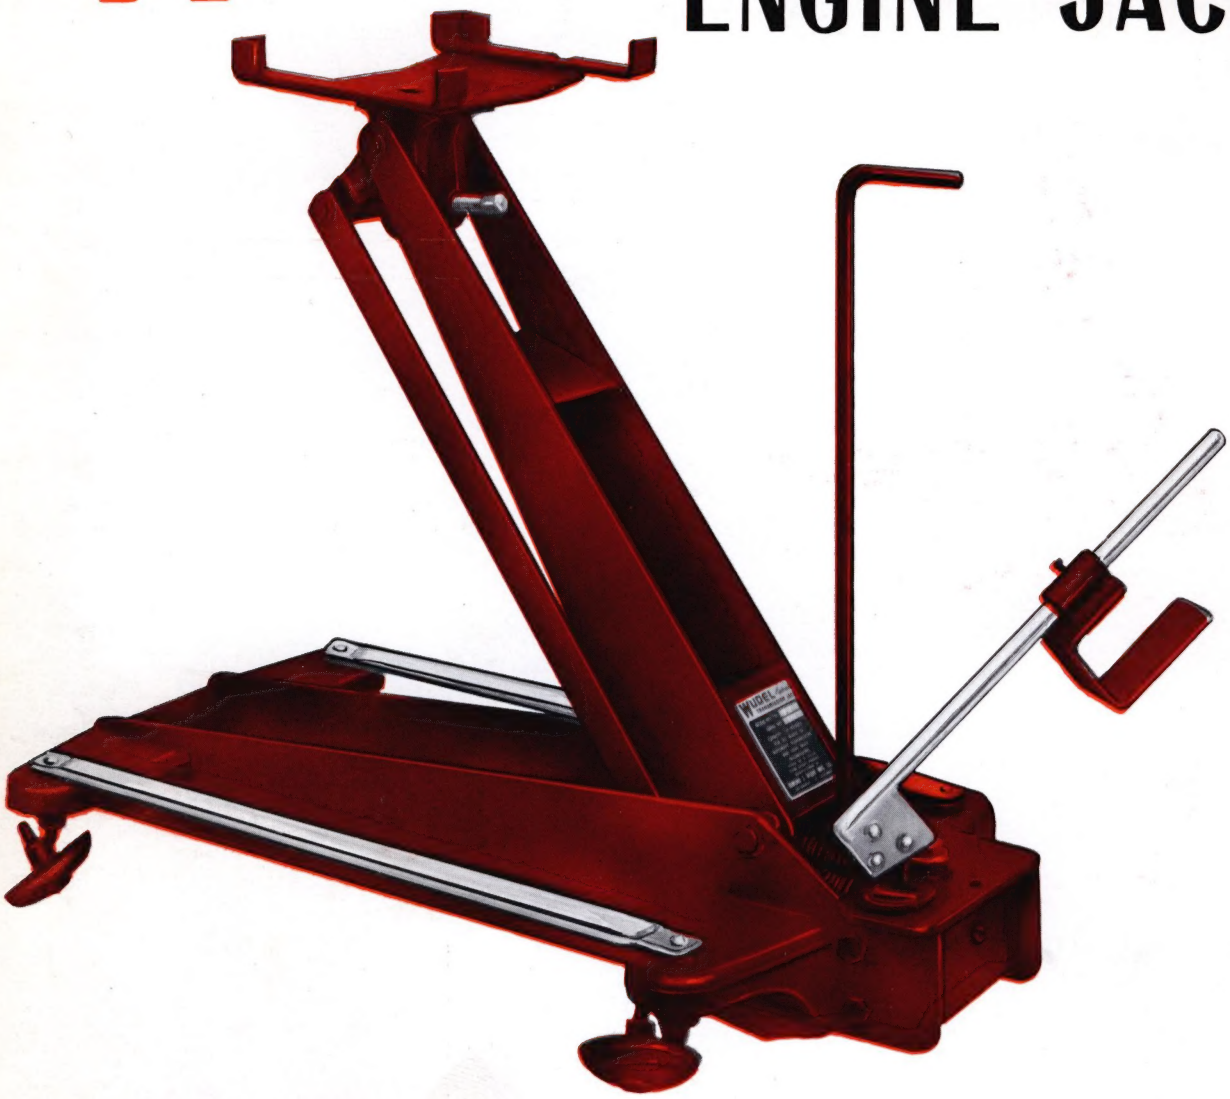
NO. 66P PORSCHE ENGINE ADAPTER, NO. 67TA VOLKSWAGEN TRANSMISSION ADAPTER, and NO. 68VW VOLKSWAGEN ENGINE ADAPTER are especially engineered and properly designed for safe handling of engines and transmissions. These adapters are designed to use with No. 700VW Volkswagen Engine and Transmission Jack shown on the following page. **DEALER NET PRICES**

No. 66P $16.75 - No. 67TA $ 23.50
No. 68VW $ 16.75



68VW

WUDEL *Hydraulic* ENGINE JACK



NO. 700VW-68VW FOR HANDLING VOLKSWAGEN ENGINES

The WUDEL No. 700VW-68VW Hydraulic Jack has been scientifically designed and built especially for easy removal and installation of Volkswagen and Porsche Engines and Transmissions. The jack is hydraulically operated to assure fractional raising and lowering for perfect positioning and alignment of engine to transmission. The pumping handle rotates a full 360°, and may be pumped by hand or foot. An 18″ extension handle is provided, which actuates the hydraulic lowering release. Overall height, low position of adapter is approximately 5″. High position about 30″. Adapter may be set into a desired rigid position or rocked, quickly aligning the engine with the transmission. No. 66P Porsche, 67TA Transmission and 68VW Volkswagen Engine Adapters, as shown on previous page, are specifically designed for the 700VW Hydraulic Jack. MODEL 700VW Hydraulic Jack is designed to handle 1000 pounds. This makes it the ideal jack for lifting either end or either side of the Volkswagen or Porsche Automobile. The 30″ high lift is often extremely advantageous.

DEALER NET PRICE No. 700VW Jack and 68VW Adapter, as shown.....$219.50
